

"A Full Service IT & Cloud Company"

Small Business IT Consulting and Cloud Services

About Us

wydraTEK LLC was founded in 2008 by Paul Wydra with the belief that the IT support industry for small businesses was lacking, and needed a complete refresh.

Most IT support companies fall into these categories:

- Provide the same support model for all companies, regardless of your organization's needs or size.
- A one-person shop who only reacts to issues when they occur, and has little to no availability to support you.

Companies like yours end up paying too much for IT support and yet you still receive a poor level of service. There has to be a better solution.

Why wydraTEK?

wydraTEK is on a mission to provide **Honest, Reliable and Flexible** IT Managed Services for our small business clients. Managed IT Services should not be "one size fits all" and wydraTEK will create an IT program that fits your budget with **affordable payment options** and **flexible contracts**.

"As a health care office and small business, I have depended on wydraTEK's ability to make our workflow seamless so that our attention is on our patient care. I would describe wydraTEK as great communicators, reliable, solutions-oriented and very fairly priced. They built us a stable network, so that any issues we have are straight forward to resolve."

- **Dr. Diane Shieh** - Amherst Orthodontics, NH
