

Providing a refreshing approach to...

# Managed IT Services for the **Dental Industry**

Many of wydraTEK LLC's clients are in the Dental Industry which include Dentists, Orthodontists and Oral Surgeons.

We are able to provide IT support for your office and act as your technical liaison with industry vendors such as Patterson EagleSoft, Dolphin, Ortho2 and Denticon to name a few.

## SWITCHING IS AS SIMPLE AS 1-2-3

We know switching IT providers can seem like a daunting task, however, we make it very simple and require limited time from you. Here's how it works.

Switching to **wydraTEK** is as easy as following these **3 STEPS**:

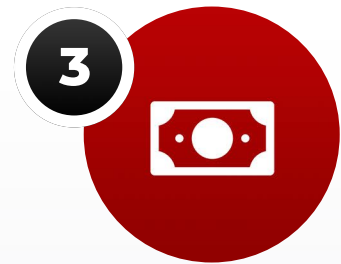

### WE PERFORM YOUR FREE DIAGNOSTIC

wydraTEK will review your existing IT setup and will prepare the recommended Treatment Plan for how we would support your company. This is done at no cost to you.

### WE FOLLOW YOUR TREATMENT PLAN

wydraTEK will execute your Treatment Plan which includes implementing best practices and standardization for your IT needs, and ensuring your practice's technology is in a great place.

### YOU START SAVING MONEY

After your Treatment Plan is executed, we focus on care and feeding activities for your IT environment. You are only billed for the time we spend supporting your company.

## WE KNOW DENTISTRY

wydraTEK follows strict policies and procedures regarding compliancy regulations that apply to all of our Dental Industry clients.

We help to ensure your IT program follows and adheres to HIPPA and PCI compliances for keeping your practice and your client's PHI & PII data secure.
